

Introduction to the *Train the Trainer* sessions

Brussels, May 2011

Transfer Tools

SUGAR promotes the exchange, discussion and transfer of policy experience, knowledge and good practices in the field of urban freight management.

To organise and develop this transfer of knowledge, SUGAR implements three type of activities or transfer tools:

- Good Practice Round Tables
- Train the Trainer Sessions
- Joint Planning Exercises

TTT Sessions

training sessions dedicated to developing new skills of partner administrations, covering both technical and soft side city logistics related policy, strategy and planning topics.

workshops including examples/exercises, where external experts train the partners' participants in solving problems and developing skills on common topics of interest.

special interest on transferring knowledge to transfer sites participants, as they would then become trainers at their local sites.

Trainers and Trainees

Trainers

external experts, or BP sites representatives, with consolidated experience on each topic

Trainees

representatives of partners with responsibilities at their local sites related to Urban Goods Distribution in general and/or the concrete topic of the session

+ other participants invited by members of the project because of their interest shown for the sessions or their complementary active participation
